An ISO 9001:2015 & OHSAS: 18001:2007
certified company

PRECISION ENGINEERING, GUARANTEED & DELIVERED.

About Us

G.G. Automotive Gears Ltd. is a leading manufacturer of traction gears and pinions, based out of Dewas, Madhya Pradesh in India. A unit spun off from its parent company, M/s Gajra Gears Ltd., GGAG has been a market leader in traction gears & pinions for over 40 years. The company has assumed market leadership because of its unmatched cost, quality and delivery standards.

G.G. Automotive Gears Ltd. is a self-sufficient organization capable of developing and manufacturing locomotive and industrial application gears & pinions, gearboxes and forged automotive components

Quality Control

GGAG's state-of-the-art P100 gear tester and inspection lab ensures your product meets the highest quality standards. We adhere to global standard processes through our integrated management systems.

Increased Capacity

GGAG has doubled its production capacity, alongside diversifying its product range. Machines such as the Höfler HF1250 and Rapid 1250K have been added to our set-up.

Forged Components

Our expertise in the field of gear manufacturing has led us to diversify into the manufacturing of forgings through this integrated and newly installed unit. GGAG produces pinions and pinion shafts upto 85 kg in weight.
